

Measure Internet Censorship

Why measure Internet censorship?

- 1 Collect evidence
- 2 Increase transparency of what's blocked
- 3 Contribute to the world's largest open dataset on Internet censorship

Install OONI Probe

OONI Probe is a free software app that **measures Internet censorship**, such as the blocking of websites and instant messaging apps (e.g., WhatsApp).

Enable **Automated testing** and contribute measurements every day!

Run tests automatically

! Heads-up!

Please **turn your VPN off** when running OONI Probe to help ensure more accurate test results.

Running OONI Probe **can potentially be risky** in certain countries.
