

OONI Explorer for Journalists

What is OONI Explorer?

OONI Explorer is the world's largest open dataset on Internet censorship.

Access OONI Explorer:
<https://explorer.ooni.org/>

Why use OONI Explorer?

- **Discover unreported censorship stories:**
From 2012 to date, OONI Explorer hosts data from 241 countries.
- **Evidence:**
Confirm reported blocks with empirical data.
- **Charts and Search Tool:**
Explore and visualize OONI data easily.

OONI data in journalism

OONI data is cited in news articles by **Wired, BBC, CNN, CBC News, CNET, The Intercept, Wall Street Journal, Deutsche Welle, Mada Masr, Al Araby, and Africa Times** (among many others).

Founded in 2012, the Open Observatory of Network Interference (OONI) is a non-profit free software project documenting Internet censorship around the world.
