

Measure Internet Censorship

Install OONI Probe

OONI Probe is a free software app that **measures Internet censorship**, such as the blocking of websites and instant messaging apps (e.g., WhatsApp).

! Heads-up!

Please **turn your VPN off** when running OONI Probe to help ensure more accurate test results.

Running OONI Probe **can potentially be risky** in certain countries.

Learn more:

<https://ooni.org/about/risks>

Founded in 2012, the Open Observatory of Network Interference (OONI) is a non-profit free software project documenting Internet censorship around the world.
