OONI | Explorer

# Investigate Internet Censorship

What is OONI Explorer?

OONI Explorer is the world's largest open dataset on Internet censorship.

Since 2012, more than a billion network measurements have been published on OONI Explorer from more than 240 countries and territories.

Access OONI Explorer:
https://explorer.ooni.org/

OONI data

Use OONI Explorer to find data on:

- **Blocking of websites**

- **Blocking of instant messaging apps** (e.g. WhatsApp)

- Testing of **circumvention tools** (e.g. Psiphon VPN)

...and more!

How is OONI data collected?

OONI Probe users around the world perform tests on their networks and contribute data, which is published on OONI Explorer in real-time.

You can contribute data by running OONI Probe:

GET IT ON Google Play

Download on the App Store

GET IT ON F-Droid

GET IT ON Desktop

OONI

Founded in 2012, the Open Observatory of Network Interference (OONI) is a non-profit free software project documenting Internet censorship around the world.
